If using the Elevation Certificate to obtain NFIP flood insurance, affix at least 2 building photographs below according to the instructions for Item A6. Identify all photographs with date taken; "Front View" and "Rear View"; and, if required, "Right Side View" and "Left Side View." When applicable, photographs must show the foundation with representative examples of the flood openings or vents, as indicated in Section A8. If submitting more photographs than will fit on this page, use the Continuation Page.

O.M.B. No. 3067-0077 Expires July 31, 1999

ATTENTION: Use of this certificate does not provide a waiver of the flood insurance purchase requirement. This form is used only to provide elevation information necessary to ensure compliance with applicable community floodplain management ordinances, to determine the proper insurance premium rate, and/or to support a request for a Letter of Map Amendment or Revision (LOMA or LOMR). You are not required to respond to this collection of information unless a valid OMB control number is displayed in the upper right corner of this form.

Instructions for completing this form can be found on the following pages.

SECTION A PROPERTY INFORMATION	1	FOR INSURANCE COMPANY USE		
BUILDING OWNER'S NAME	POLICY NUMBER			
STREET ADDRESS (Including Apt., Unit, Suite and/or Bldg. Number) OR P.O. ROUTE AND	COMPANY NAIC NUMBER

Prescott	STATE 2	ZIP CODE 86303		
SECTION B FLOOD INSURANCE RAT	E MAP (FIRM) INFORMATION			
Provide the following from the proper FIRM (See Instructions):				
	OF FIRM INDEX 5. FIRM ZONE	6. BASE FLOOD ELEVATION (in AO Zones, use depth)		
040093 1020 C 9-	20-96 A7	5620.3		
7. Indicate the elevation datum system used on the FIRM for Base Flood Elevations (BFE): NGVD '29 Other (describe on back) 8. For Zones A or V, where no BFE is provided on the FIRM, and the community has established a BFE for this building site, indicate the community's BFE: feet NGVD (or other FIRM datum—see Section B, Item 7).				
SECTION C BUILDING ELEVA	ATION INFORMATION			
of Stable Heet NGVD (or other FIRM datum—see Section B, (b). FIRM Zones V1-V30, VE. and V (with BFE). The bottom of the lower the selected diagram, is at an elevation of below (c). FIRM Zone A (without BFE). The floor used as the reference level from below (check one) the highest grade adjacent to the building. (d). FIRM Zone AO. The floor used as the reference level from the selection one) the highest grade adjacent to the building. If no flood depth numberel) elevated in accordance with the community's floodplain managers. 3. Indicate the elevation datum system used in determining the above reference Comments on Page 2). (NOTE: If the elevation datum used in managers.) 4. Elevation reference mark used appears on FIRM: Yes No (See Section B. Item 7), then convert the elevations to the date equation under Comments on Page 2.) 4. Elevation reference mark used appears on FIRM: Yes No (See Section B. Item 7), then convert the elevation of the date equation under Comments on Page 2.) 5. The reference level elevation is based on: Actual construction (NOTE: Use of construction drawings is only valid if the building does not case this certificate will only be valid for the building during the course of will be required once construction is complete.)	st horizontal structural member D (or other FIRM datum—see Second the selected diagram is feet a place of	bove or below (check 's lowest floor (reference No Unknown /D '29 Other (describe rent than that used on and show the conversion floor in place, in which tion Elevation Certificate		
 The elevation of the lowest grade immediately adjacent to the building is Section B, Item 7). 	;: Ver V. C. feet NGVD	or other FIHM datum-see		
SECTION D COMMUNITY	INFORMATION			
1. If the community official responsible for verifying building elevations speris not the "lowest floor" as defined in the community's floodplain manage floor" as defined by the ordinance is:	ement ordinance, the elevation	of the building's "lowest		

Note: In all A Zones, the reference level is the top of the lowest floor; in V Zones the reference level is the bottom of the lowest horizontal structural member (see diagram on page 2). Agents should refer to the Flood Insurance Manual for instruction on lowest floor definition.

DIAGRAM NUMBER 5

ALL BUILDINGS, INCLUDING MANUFACTURED (MOBILE) HOMES ELEVATED ON PIERS, POSTS, COLUMNS, SHEAR WALLS, WITH OR WITHOUT PARKING AREA BELOW ELEVATED FLOOR.

Distinguishing Feature - For all zones, the area below the elevated floor is open, with no obstruction to the flow of flood waters (open wood lattice work or readily removable insect screening is permissible).

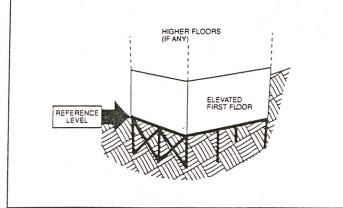

DIAGRAM NUMBER 6

ALL BUILDINGS, INCLUDING MANUFACTURED (MOBILE) HOMES ELEVATED ON PIERS, POSTS, COLUMNS, SHEAR WALLS, WITH OR WITHOUT PARKING AREA BELOW ELEVATED FLOOR.

Distinguishing Feature - For V Zones only, the area below the elevated floor is enclosed, either partially or fully, by solid breakaway walls." When enclosed area is greater than 300 square feet or contains equipment servicing the building, use Diagram Number 7; this will result in a higher insurance rate. The enclosed area can be used for parking, building access or limited storage.

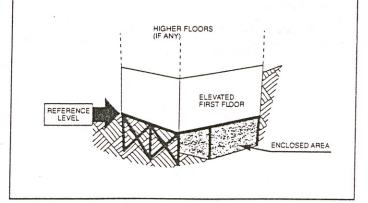

DIAGRAM NUMBER 7

ALL BUILDINGS, INCLUDING MANUFACTURED (MOBILE) HOMES ELEVATED ON PIERS, POSTS, COLUMNS, SHEAR WALLS, SOLID NON-BREAKAWAY WALLS, WITH OR WITHOUT PARKING AREA BELOW ELEVATED FLOOR.

Distinguishing Feature - For all zones, the area below the elevated floor is enclosed, either partially or fully, by solid <u>non-breakaway</u> walls, <u>or contains</u> equipment servicing the building. For V Zones only, the area is enclosed, either partially or fully, by solid breakaway walls." having an enclosed area greater than 300 square feet. For A Zones only, with an area enclosed by solid walls having proper openings." and used only for parking, building access, or limited storage, use Diagram Number 8 to determine the reference level.

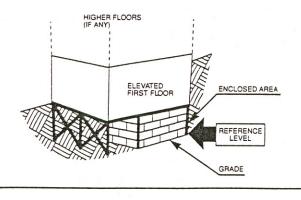

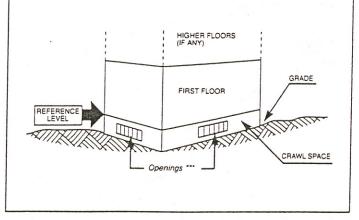

DIAGRAM NUMBER 8

ALL BUILDINGS CONSTRUCTED ABOVE AN UNFINISHED SPACE, INCLUDING CRAWL SPACE.

Distinguishing Feature - For A Zones only, the area below the first floor is enclosed by solid or partial perimeter walls, is unfinished, and contains no equipment servicing the structure. The area can be used for parking, building access, or limited storage.

- Under the National Flood Insurance Program's risk classification and insurance coverage, a floor that is below ground level (grade) on all sides is considered a basement even though the floor is used for living purposes, or as an office, garage, workshop, etc.
- Solid breakaway walls are walls that are not an integral part of the structural support of a building and are intended through their design and construction to collapse under specific lateral loading forces, without causing damage to the elevated portion of the building or supporting foundation. An area so enclosed is not secure against forceable entry.
- "" If the area below the lowest floor is fully enclosed, then a minimum of two openings are required with a total net area of at least one square inch for every square foot of area enclosed with the bottom of the openings no more than one foot above grade. Alternatively, certification may be provided by a registered professional engineer or architect that the design will allow equalization of hydrostatic flood forces on exterior walls. If neither of these criteria are met, then the reference level is the lowest grade adjacent to the structure.
