

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not constitute any part of the Flood Insurance Study or Flood Hazard Map. It is intended for use only for the purpose of determining flood insurance rates and for the purpose of providing information to the insured.

To obtain more detailed information in areas where Base Flood Elevations are shown, consult the Flood Profile and Floodway Data and/or Summary of Elevation Data sheets located within the Flood Insurance Study (FIS) report for your community. The FIS report should be used to determine that the data shown on the FIS report represent actual elevations. These data are intended for use by the insurance industry. Flood elevations are provided in the FIS report should be used in conjunction with the FIS report for purposes of construction and/or floodplain management.

Coastal Base Flood Elevations shown on this map apply to the coastal areas of the United States. Coastal Base Flood Elevations are provided in the FIS report should be used in conjunction with the FIS report for purposes of construction and/or floodplain management. The FIS report should be used to determine that the data shown on the FIS report represent actual elevations. These data are intended for use by the insurance industry. Flood elevations are provided in the FIS report should be used in conjunction with the FIS report for purposes of construction and/or floodplain management.

Boundaries of the Floodway Areas were compiled at cross sections and interpolated between cross sections. The boundaries are based on hydrologic considerations with regard to the National Flood Insurance Program. Floodway Areas and other pertinent boundary data are provided in the Flood Insurance Study report for your community.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures. Refer to Section 2.1 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The projection used in the preparation of this map was the Universal Transverse Mercator (UTM) system. The datum used was the North American Datum of 1983 (NAD 83). Elevation is shown in feet above mean sea level. The datum used in the production of this map is the datum used in the production of the FIS report for your community. These differences do not affect the accuracy of this map.

Flood elevations on this map are referenced to the North American Vertical Datum of 1983. These flood elevations must be compared to elevations and ground elevations referenced to the same vertical datum. For information regarding conversion between the National Flood Insurance Study datum of 1983 and other vertical datums, contact the National Geographic Survey at <http://www.ngs.noaa.gov> or contact the National Geographic Survey at 1205 G Street, N.W., Washington, D.C. 20005.

To obtain current elevation, description, and location information for benchmarks shown on this map, please contact the Information Services Branch of the National Geographic Survey at (801) 771-0284, or visit its website at <http://www.ngs.noaa.gov>.

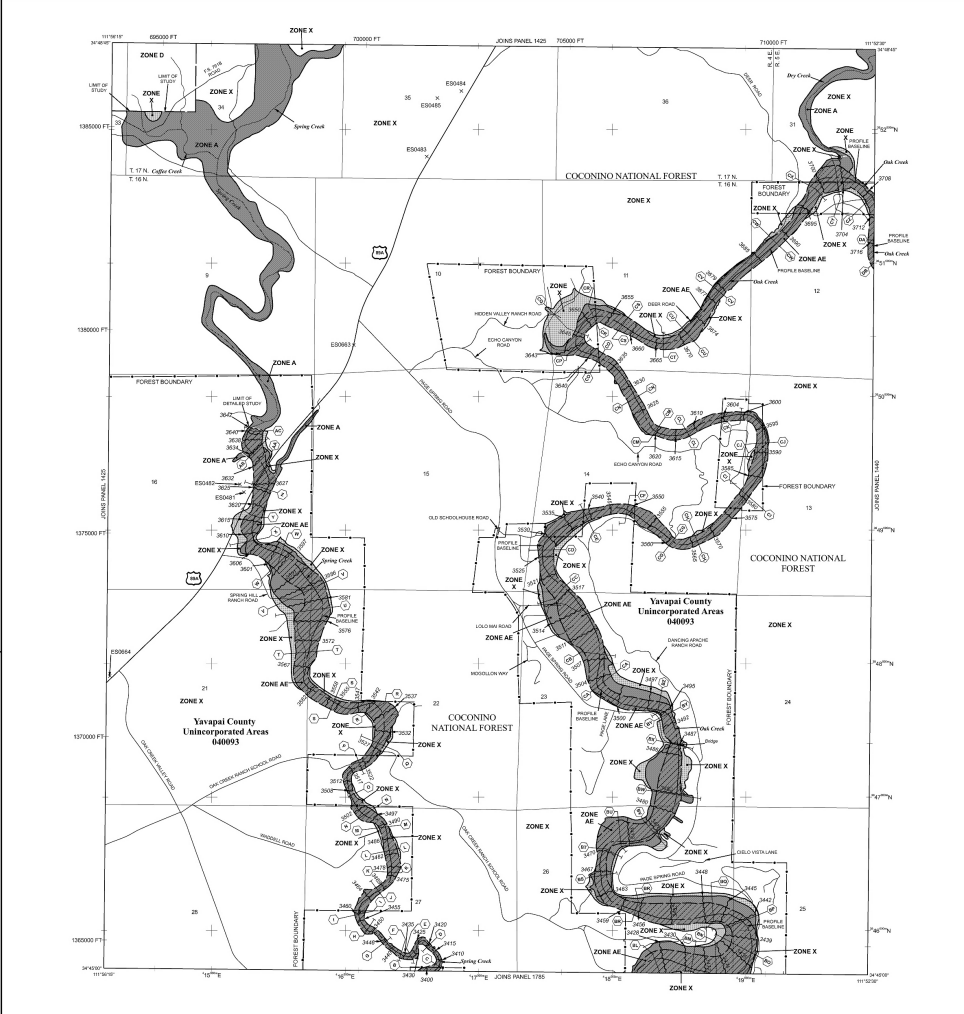

Base map information shown on this map was provided by Yavapai County. This map, produced in 2005, was provided in digital format at a scale of 1:10,000.

This map, which was created and revised using current geospatial information from the previous FIS for this jurisdiction. The Floodway and Floodway Area boundaries shown on this map may not be exact. The Flood Profile and Floodway Data tables in the Flood Insurance Study report (which contain geospatial data) may reflect these changes. The Floodway and Floodway Area boundaries shown on this map may not be exact. The Flood Profile and Floodway Data tables in the Flood Insurance Study report (which contain geospatial data) may reflect these changes. The Floodway and Floodway Area boundaries shown on this map may not be exact. The Flood Profile and Floodway Data tables in the Flood Insurance Study report (which contain geospatial data) may reflect these changes.

Please refer to the explanatory annex map located on the cover map of the FIS report showing the layout of map panels covering this regulatory jurisdiction, and a listing of communities with corresponding National Flood Insurance Program zones for each community as well as a listing of the panels on which each community is located.

Contact the FEMA Map Service Center at 1-800-358-6168 for information on available products associated with the FIS. Available products may include preliminary report letters of map change, a Flood Insurance Study report, and digital vector data files. The FEMA Map Service Center website is located at <http://www.fema.gov>.

If you have questions about this map or questions concerning the National Flood Insurance Program, please call 1-877-FEMA-MAP (1-877-362-7627) or visit the FEMA website at <http://www.fema.gov>.

LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

- Zone A: Special Flood Hazard Areas Subject to Inundation by the 1% Annual Chance Flood
- Zone AE: Coastal High Water Surfaces
- Zone D: Flood depths of 1 to 3 feet (small areas of ponding); Base Flood Elevation
- Zone AD: Flood depths of 1 to 3 feet (small areas of ponding); Base Flood Elevation
- Zone AR: Special Flood Hazard Areas Subject to Inundation by the 1% Annual Chance Flood
- Zone AV: Flood depths of 1 to 3 feet (small areas of ponding); Base Flood Elevation
- Zone X: Coastal Flood zone with velocity hazard (wave action); Base Flood Elevation

FLOODWAY AREAS IN ZONE AE

- Zone AE: Floodway Areas in Zone AE

OTHER FLOOD AREAS

- Zone X: Floodway Areas in Zone X

OTHER AREAS

- Zone X: Floodway Areas in Zone X
