

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify the areas subject to flooding, particularly from local drainage, or ground use. This information may be obtained from the Flood Insurance Study (FIS) report for the community.

To obtain more detailed information in areas where Base Flood Elevations (BFEs) are shown, refer to the Flood Insurance Study (FIS) report for the community. The Flood Profile and Floodway Data and/or Summary of Damaged Structures (SDS) information may be obtained from the FIS report for the community. The FIS report should be used to determine the BFE for a particular structure. The FIS report should be used to determine the BFE for a particular structure. The FIS report should be used to determine the BFE for a particular structure.

Coastal Base Flood Elevations: Coasts on the map apply information of 100 Year Average Recurrence Interval (ARI) Storm Surge (ASOS) data from the National Oceanic and Atmospheric Administration (NOAA) to the FIS report. The FIS report should be used to determine the BFE for a particular structure. The FIS report should be used to determine the BFE for a particular structure. The FIS report should be used to determine the BFE for a particular structure.

Special Flood Hazard Areas: The FIS report should be used to determine the BFE for a particular structure. The FIS report should be used to determine the BFE for a particular structure. The FIS report should be used to determine the BFE for a particular structure.

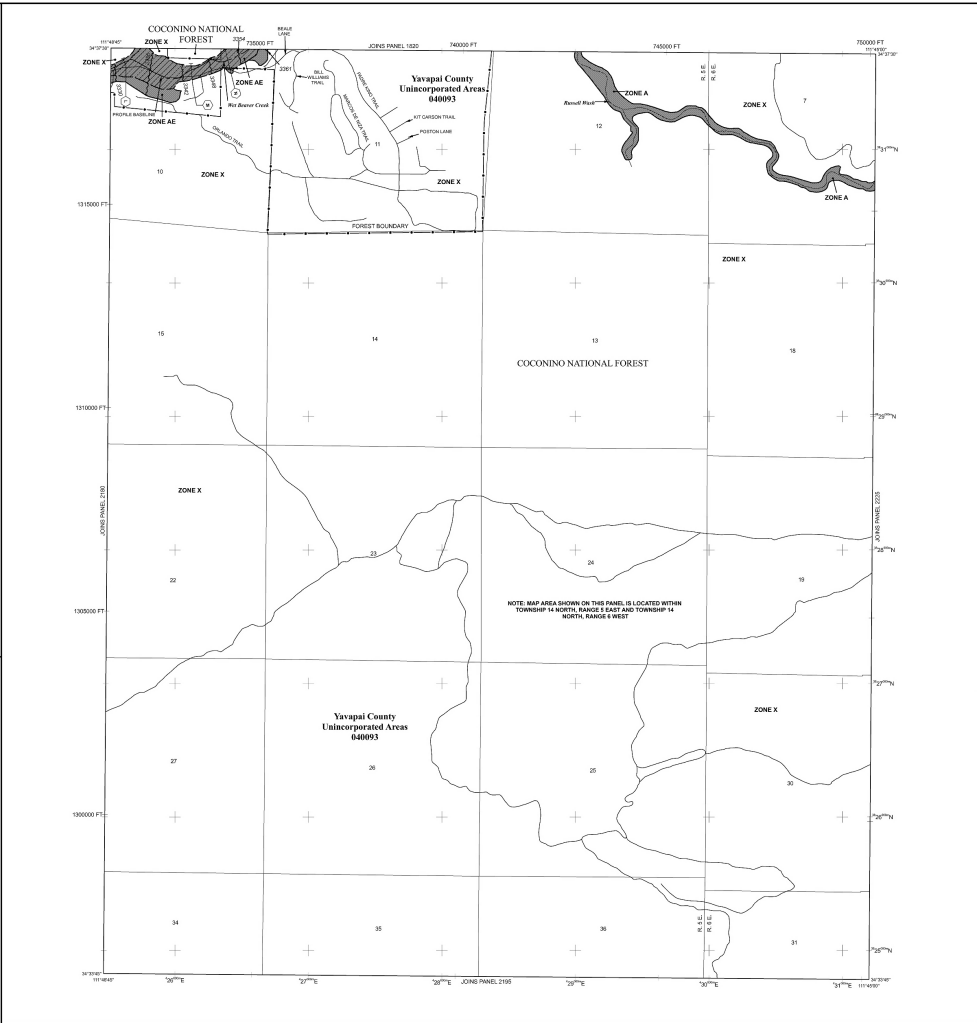

Projections: The FIS report should be used to determine the BFE for a particular structure. The FIS report should be used to determine the BFE for a particular structure. The FIS report should be used to determine the BFE for a particular structure.

Map Scale: The FIS report should be used to determine the BFE for a particular structure. The FIS report should be used to determine the BFE for a particular structure. The FIS report should be used to determine the BFE for a particular structure.

Map Accuracy: The FIS report should be used to determine the BFE for a particular structure. The FIS report should be used to determine the BFE for a particular structure. The FIS report should be used to determine the BFE for a particular structure.

Map Date: The FIS report should be used to determine the BFE for a particular structure. The FIS report should be used to determine the BFE for a particular structure. The FIS report should be used to determine the BFE for a particular structure.

Map Contact: The FIS report should be used to determine the BFE for a particular structure. The FIS report should be used to determine the BFE for a particular structure. The FIS report should be used to determine the BFE for a particular structure.

LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

- ZONE A:** Special Flood Hazard Area subject to inundation by the 1% Annual Chance Flood.
- ZONE AE:** Special Flood Hazard Area subject to inundation by the 1% Annual Chance Flood, with a base flood elevation (BFE) of 1 to 3 feet (local areas of ponding). Base Flood Elevation (BFE).
- ZONE X:** Special Flood Hazard Area subject to inundation by the 1% Annual Chance Flood.

OTHER FLOOD AREAS

- ZONE X:** Special Flood Hazard Area subject to inundation by the 1% Annual Chance Flood.

OTHER AREAS

- Zone X:** Areas determined to be outside the Special Flood Hazard Area.

COAST, DAMS, AND OTHER STRUCTURES

- Coast:** Areas determined to be outside the Special Flood Hazard Area.

OTHER PROTECTED AREAS (OPA)

- OPA:** Areas determined to be outside the Special Flood Hazard Area.

MAP SYMBOLS

- Coast:** Areas determined to be outside the Special Flood Hazard Area.
