

**NOTES TO USERS**

This map is for use in administering the National Flood Insurance Program. It does not constitute a warranty of any kind, and it is not intended to be used for purposes other than those intended. The user assumes all responsibility for any use of this map for purposes other than those intended.

To obtain more detailed information in areas where Base Flood Elevations (BFEs) are shown, users should refer to the Flood Profile and Floodway Data and/or Summary of Damaged Elevations data contained within the Flood Insurance Study (FIS) report that accompanies this FIS. Users should be aware that BFEs shown on the FIS report represent predicted values and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS report should be verified in conjunction with the FIS for purposes of construction and/or floodplain management.

Coastal Base Flood Elevations (CBEs) on this map represent information of 100 Year Average Recurrence Interval (ARI) Storm Surge (AS) based on the National Oceanic and Atmospheric Administration's (NOAA) Coastal Storm Surge (CSS) report that accompanies this FIS. Users should be aware that CBEs shown on the FIS report represent predicted values and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS report should be verified in conjunction with the FIS for purposes of construction and/or floodplain management.

Boundaries of the Floodway Areas were compiled at cross sections and interpolated between cross sections. The boundaries were based on hydraulic considerations with regard to information of the National Flood Insurance Program. Floodway widths and other pertinent Floodway data are provided in the Flood Insurance Study report for the jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures. Refer to Section 2.3 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The projection used in the preparation of this map was Universal Transverse Mercator (UTM) Zone 12. The datum used was the North American Vertical Datum of 1988. These flood elevations must be compared to structures and ground elevations referenced to the same vertical datum. For information regarding conversion between the National Oceanic and Atmospheric Administration's (NOAA) datum and other vertical datums, refer to the National Oceanic and Atmospheric Administration's (NOAA) datum conversion website at [http://www.noaa.gov/datum\\_conversion](http://www.noaa.gov/datum_conversion) or contact the National Oceanic and Atmospheric Administration's (NOAA) datum conversion website at [datum@noaa.gov](mailto:datum@noaa.gov).

Base map information shown on this FIS was provided by Yavapai County. This map, produced in 2005, was provided in digital format at a scale of 1"=100'.

This map, which was prepared and printed using digital cartographic techniques from those shown on the previous FIS for this jurisdiction. The Floodway and Floodway Data were derived from the previous FIS. The Flood Profile and Floodway Data were derived from the previous FIS. Geographic details shown on this map are based on the best data available at the time of publication. Because changes due to construction or development may have occurred since the map was published, users should conduct appropriate community officials to verify current property locations.

Please refer to the explanatory material Map Users for an overview map of the county showing the layout of map panels, community map resolution, additional, and a listing of communities with corresponding National Flood Insurance Program zones for each community as well as a listing of the panels on which each community is located.

Contact the FEMA Map Service Center at 1-800-358-6118 for information on available products associated with this FIS. Available products may include preliminary report letters of Map Change, a Flood Insurance Study report, and/or digital versions of this map.
