

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not constitute a guarantee, warranty, or endorsement of the accuracy or reliability of the information shown on this map, nor does it constitute a representation of the Federal Government's liability for any loss or damage caused by flooding. The user should consult the Flood Insurance Study report for more information.

To obtain more detailed information in areas where **Base Flood Elevations (BFEs)** are shown, consult the Flood Insurance Study report for the Flood Profile and Floodway Data and/or Survey of Shaded Elevations data contained within the Flood Insurance Study (FIS) report that encompasses the FEMA County. It should be noted that BFEs shown on the FIS report represent estimated elevations. These BFEs are intended for flood insurance rating purposes only and should not be used as the basis for flood insurance information. Accordingly, flood elevation data presented in the FIS report should be related in conjunction with the FIS for purposes of construction and/or floodplain management.

Coastal Base Flood Elevations shown on this map are based on a combination of NOAA's American Vertical Datum of 1988 (AVD88) data of the FIS and the National Oceanic and Atmospheric Administration's (NOAA) National Coastal High Water Survey (NCHWS) data. Shaded elevations shown in the Flood Insurance Study report are intended to provide a conservative estimate of the elevation of the water surface for construction and/or floodplain management purposes when they are higher than the elevations shown on the FIS.

Boundaries of the Floodways were compiled at cross sections and interpolated between cross sections. The Floodway was based on hydraulic computations with input of information of the National Flood Insurance Program. Floodway width and other pertinent Floodway data are provided in the Flood Insurance Study report for the jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by **Flood Protection Structures**. Refer to Section 2.3 "Flood Protection Structure" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The projection used in the preparation of this map was Universal Transverse Mercator (UTM) Zone 13. The boundary data was from the 2005 Census of Decennial Statistics, reported projection of UTM zones used in the production of FISs for adjacent jurisdictions. Any minor digit positional differences in map features across jurisdiction boundaries. These differences do not affect the accuracy of the FIS.

Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These flood elevations must be corrected to elevation and ground referenced elevations to the same vertical datum. For information regarding conversion between the National Oceanic and Atmospheric Administration's (NOAA) National Coastal High Water Survey (NCHWS) data and the National Oceanic and Atmospheric Administration's (NOAA) National Flood Insurance Survey (NFIS) data, refer to the National Oceanic and Atmospheric Administration's (NOAA) National Flood Insurance Survey (NFIS) data.

To obtain current elevation, description, and location information for **beach nourishment** shown on this map, please contact the Information Services Branch of the National Oceanic and Atmospheric Administration, or visit the website at <http://www.noaa.gov>.

Base map information shown on this map was provided by Yavapai County. This map, produced in 2005, was provided in digital format at a scale of 1:10,000.

This map, which was created and printed, shows changed configurations from those shown on the previous FIS for this jurisdiction. The Floodway and Floodway Data were transferred from the previous FIS to this FIS. The Floodway Data shown on this map are based on the National Oceanic and Atmospheric Administration's (NOAA) National Flood Insurance Survey (NFIS) data. The Floodway Data shown on this map are based on the National Oceanic and Atmospheric Administration's (NOAA) National Flood Insurance Survey (NFIS) data.

Geographic details shown on this map are based on the best data available at the time of publication. Because changes due to annexations or de-annexations may have occurred since the map was published, map users should contact appropriate community officials to verify current corporate line locations.

Please refer to the explanatory material Map Users for an overview map of the county, showing the layout of map panels, community map resolution, additional, and a listing of contributing state-authorized National Flood Insurance Program panels for each community as well as a listing of the panels on which each community is located.

Contact the **FEMA Map Service Center** at 1-800-368-6818 for information on available products associated with the FIS. Available products may include preliminary report letters of Map Change, a Flood Insurance Study report, and digital versions of this map. The FEMA Map Service Center can also be reached by fax at 1-800-368-6818 or by e-mail at fema@fema.dhs.gov.

If you have questions about this map or questions concerning the National Flood Insurance Program in general, please call 1-877-FEMA-MAP (1-877-368-6818) or visit the FEMA website (www.fema.gov).

LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

- ZONE A:** No-Return Flood Elevation Determined. Base Flood Elevation Determined.
- ZONE B:** Flood depths of 1 to 3 feet (shaded areas of pinkish). Base Flood Elevation Determined.
- ZONE C:** Flood depths of 3 to 6 feet (shaded areas of yellow). Base Flood Elevation Determined.
- ZONE D:** Special Flood Hazard Area (shaded areas of light blue). Base Flood Elevation Determined.
- ZONE X:** Flood depths of 6 feet or more (shaded areas of dark blue). Base Flood Elevation Determined.

FLOODWAY AREAS IN ZONE A:

- ZONE A:** Floodway areas (shaded areas of light blue). Base Flood Elevation Determined.

OTHER FLOOD AREAS:

- ZONE B:** Flood depths of 1 to 3 feet (shaded areas of pinkish). Base Flood Elevation Determined.

OTHER AREAS:

- Zone C:** Areas determined to be subject to the 1% annual chance flood with average depths of less than 1 foot of water above base flood elevation and are not considered to be areas of special flood hazard.

OTHER FEATURES:

- Boundary:** Jurisdiction Boundary
- Zone Boundary:** Zone Boundary
- Open and Open Water:** Open and Open Water
- Boundary:** Boundary
- Structure:** Structure
- Water:** Water
- Other:** Other
