

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not constitute a warranty of any kind, nor does it constitute a contract. The user assumes all responsibility for the use of the information provided on this map.

To obtain more detailed information in areas where **Base Flood Elevations** are shown, contact the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that data shown on the FIS report represent the best available information at the time of the FIS report. The FIS report should be used in conjunction with the FIS for purposes of construction and floodplain management.

Coastal Base Flood Elevations shown on this map apply to the portion of the United States that is subject to coastal flooding. Users of this FIRM should be aware that coastal base flood elevations are provided in the FIS report. Elevations shown in the FIS report are based on the FIS report. Elevations shown in the FIS report are based on the FIS report.

Boundaries of the floodways are compiled at cross sections and interpolated between cross sections. The boundaries are based on hydrologic considerations with regard to the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the FIS report. Users should refer to the FIS report for information on flood control structures for this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures. Refer to Section 2 of the FIS report for information on flood control structures for this jurisdiction.

The projection used in the preparation of this map is Universal Transverse Mercator (UTM). The datum used is the North American Vertical Datum of 1988. These flood elevations must be compared to elevations referenced to the same vertical datum. For information regarding conversion between the National Flood Insurance Study (NFIS) datum and other vertical datums, refer to the National Geodetic Survey at www.ngs.noaa.gov or contact the National Geodetic Survey at the following address:

Base map information shown on this FIRM was provided by Yavapai County. This map, produced in 2005, was provided in digital format at a scale of 1:10,000.

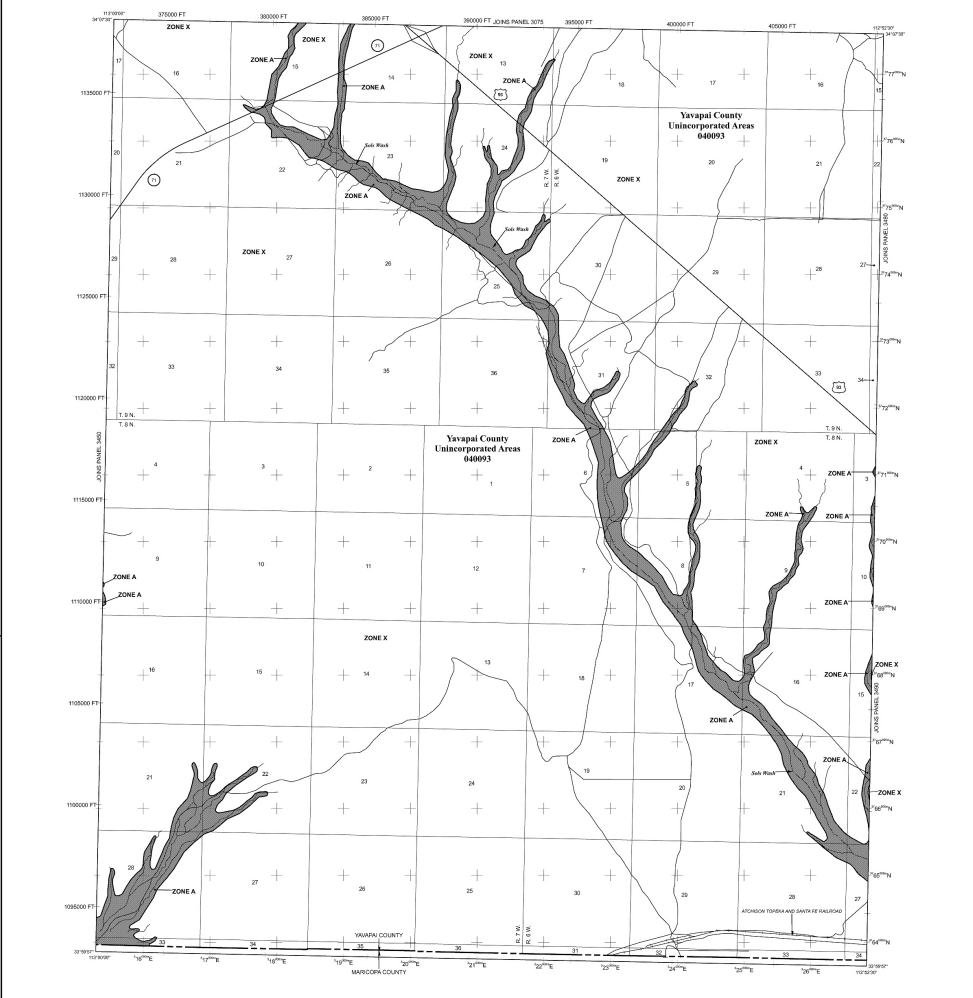

The map, which was created and printed using digital cartographic techniques from data shown on the previous FIRM for this jurisdiction. The Floodway and Floodway Widths shown on this map were derived from the FIS report. The Floodway and Floodway Widths shown on this map were derived from the FIS report.

Geographic details shown on this map are based on the best data available at the time of publication. Because changes due to amendments or discontinuance may have occurred since the map was published, users should contact appropriate community officials to verify current corporate lot locations.

Please refer to the explanatory **panel map** for an overview map of the county showing the layout of map panels, community map resolution, additional, and a listing of communities with corresponding National Flood Insurance Program panels for each community as well as a listing of the panels on which each community is located.

Contact the **FIRM Map Service Center** at 1-800-358-6618 for information on available products associated with the FIRM. Available products may include preliminary report letters of Map Change, a Flood Insurance Study report, and/or digital versions of this map. The FIRM Map Service Center can also be reached by fax at (602) 977-3077 or by e-mail at firm@yavapai.gov.
