

**NOTES TO USERS**

This map is for use in administering the National Flood Insurance Program. It does not constitute a warranty of accuracy or a promise, particularly with respect to flood insurance or other data. The user assumes all responsibility for any use of the information contained herein for purposes not intended by the National Flood Insurance Program.

To obtain more detailed information in areas where **Base Flood Elevations** are shown, users should refer to the Flood Insurance Study (FIS) report that accompanied the Flood Profile and Floodway Data (FP&FD) report that accompanied the FIS. Users should be aware that the FIS is shown on the FIS report and that the FIS report should be used as the authoritative source of information. The FIS report should be used in conjunction with the FIS report for purposes of construction and floodplain management.

**Coastal Base Flood Elevations** shown on this map are the result of information of the National Oceanic and Atmospheric Administration (NOAA) Coastal High Water Survey (CHWS) and the National Oceanic and Atmospheric Administration (NOAA) Coastal Storm Surge Survey (CSSS). Users of this FIS should be aware that the CHWS and CSSS are provided in the Survey of Base Flood Elevations in the Flood Insurance Study report for the jurisdiction. Elevations shown in the Survey of Base Flood Elevations table should be used for construction and floodplain management purposes when they are higher than the elevations shown on this FIS.

Boundaries of the **Floodways** were compiled at cross sections and interpolated between cross sections. The boundaries were based on hydraulic considerations with regard to information of the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for the jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by **Flood Protection Structures**. Refer to Section 2.3 "Flood Protection Structures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The **projection** used in the preparation of this map was Universal Transverse Mercator (UTM) Zone 13. The **datum** used was the North American Datum of 1983 (NAD 83). The **vertical datum** used in the production of this map is the National Geodetic Survey (NGS) Mean Sea Level (MSL). For information regarding conversion between the National Geodetic Survey (NGS) Mean Sea Level (MSL) and other vertical datums, refer to the National Geodetic Survey website at <http://www.ngs.noaa.gov> or contact the National Geodetic Survey at the following address:

National Geodetic Survey

To obtain current elevation, description, and location information for **beach nourishment** shown on this map, please contact the Information Services Branch of the National Geodetic Survey at (301) 761-3302, or visit its website at <http://www.ngs.noaa.gov>.

**Base map** information shown on this map was provided by Yavapai County. This map, produced in 2005, was provided in digital format at a scale of 1:12,000.

This map, which shows natural and man-made features, does not constitute a warranty of accuracy or a promise. The Flood Profile and Floodway Data (FP&FD) report that accompanied the FIS report should be used as the authoritative source of information. The FIS report should be used in conjunction with the FIS report for purposes of construction and floodplain management.

**Geographic** features shown on this map are based on the best data available at the time of publication. Because changes due to amendments or de-amendments may have occurred since the map was published, users should contact appropriate community officials to verify current geographic locations.

Please refer to the explanatory notes that appear on an overview map of the county showing the layout of map panels covering this regulatory subdivision, and a listing of contributing data concerning National Flood Insurance Program maps for each community as well as a listing of the panels on which each community is located.

Contact the **FEMA Map Service Center** at 1-800-358-6118 for information on available products associated with the FIS. Available products may include preliminary report letters of Map Change, a Flood Insurance Study report, and/or digital versions of this map. The FEMA Map Service Center may also be reached by fax at 1-800-358-6118 or by e-mail at [fema@fema.dhs.gov](mailto:fema@fema.dhs.gov).

If you have **questions about this map** or questions concerning the National Flood Insurance Program in general, please call 1-877-FEMA-MAP (1-877-362-6277) or visit the FEMA website (<http://www.fema.gov>).
