

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not constitute a warranty of accuracy or a guarantee of insurance coverage. The information on this map is for informational purposes only and should not be used as a basis for any insurance policy. The information on this map is for informational purposes only and should not be used as a basis for any insurance policy.

To obtain more detailed information in areas where Base Flood Elevations (BFEs) are shown, users should refer to the Flood Profile and Floodway Data and/or Summary of Shaded Elevations data contained within the Flood Insurance Study (FIS) report that accompanies this FIS. Users should be aware that the FIS shown on the FIS report represent actual elevations. These elevations are subject to future information. Accordingly, flood elevation data presented in the FIS report should be obtained in conjunction with the FIS for purposes of construction and floodplain management.

Coastal Base Flood Elevations (CBEs) on this map are the result of information of U.S. Army Corps of Engineers (ACEC) National Vertical Datum of 1988 (NVD-88). Users of this FIS should be aware that CBEs are not shown on the FIS. Users should refer to the Summary of Shaded Elevations data in the Flood Insurance Study report for more information. Elevations shown in the Summary of Shaded Elevations data should be used for construction and floodplain management purposes when they are higher than the elevations shown on this FIS.

Boundaries of the Floodway were compiled at cross sections and interpolated between cross sections. The Floodway data are based on hydrologic computations with input of information of the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for the jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by flood insurance. Refer to Section 2.1 "Flood Insurance Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The projection used in the preparation of this map was Universal Transverse Mercator (UTM) Zone 12. The datum used was the North American Datum of 1983. In areas where ground elevations are shown, the elevation is in feet above mean sea level. In areas where ground elevations are not shown, the elevation is in feet above mean sea level. These elevations do not affect the accuracy of the FIS.

Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These flood elevations must be compared to structure and ground elevations referenced to the same vertical datum. For information regarding conversion between the National Oceanic and Atmospheric Administration (NOAA) datum and the North American Vertical Datum of 1988, see the National Oceanic and Atmospheric Administration (NOAA) website at http://www.ncei.noaa.gov/pub/other/vertical_datums.pdf or contact the National Oceanic Survey at the following address:

NOAA Information Services
 NOAA NVD02
 National Geospatial Survey
 1215 Constitution Avenue, NE
 Silver Spring, MD 20910-3282
 (301) 761-3282

To obtain current elevation, description, and/or location information for bench marks shown on this map, please contact the Information Services Branch of the National Oceanic Survey at (301) 761-3282, or visit its website at <http://www.ncei.noaa.gov>.

Base map information shown on this FIS was provided by Yavapai County. This map, produced in 2005, was provided in digital format at a scale of 1:12,000.

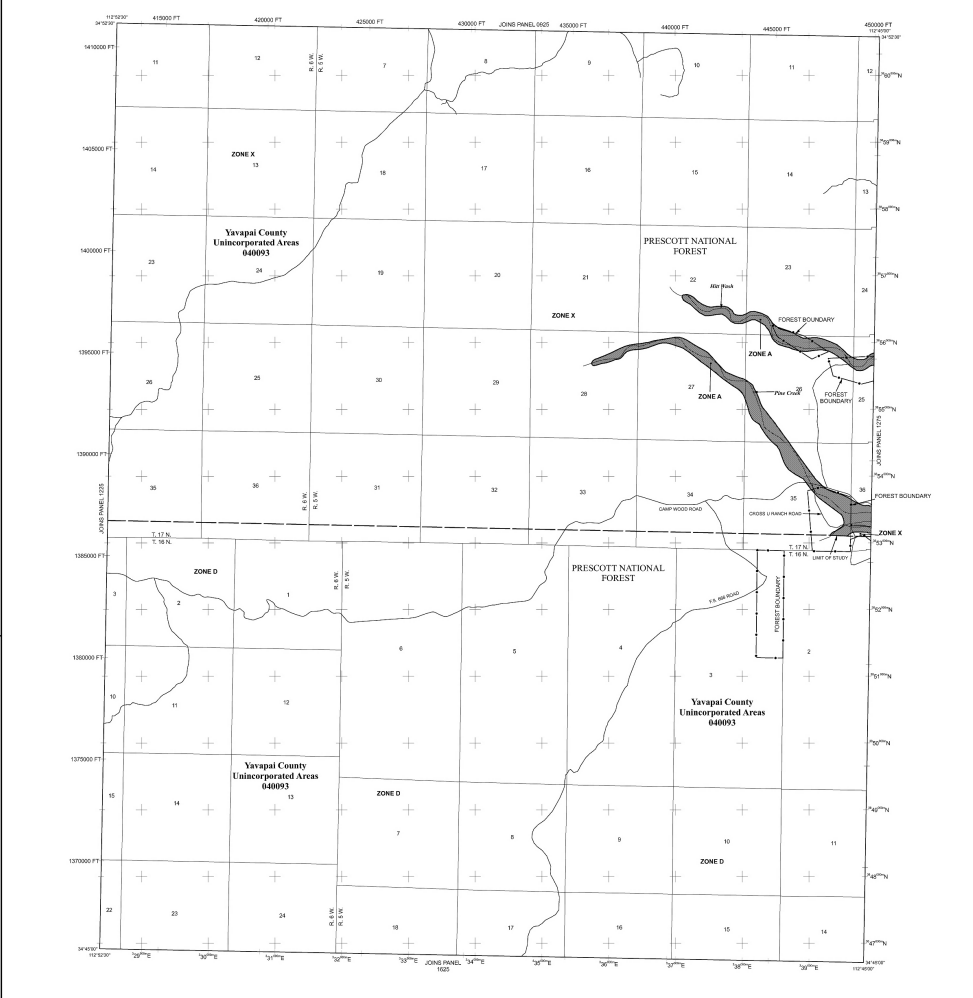

This map, which was prepared and printed, shows changed configurations from those shown on the previous FIS for this jurisdiction. The Floodway and Floodway Data were transferred from the previous FIS. The FIS may have been updated with the National Oceanic and Atmospheric Administration (NOAA) website at <http://www.ncei.noaa.gov>.

Geographic details shown on this map are based on the best data available at the time of publication. Because changes due to annexation or de-annexation may have occurred since this map was published, map users should contact appropriate community officials to verify current corporate line locations.

Please refer to the explanatory material Map Users for an overview map of the county showing the layout of map panels. Community map regulatory authorities, and a listing of contributing data sources for the National Flood Insurance Program, are available on the FIS website at <http://www.flood.gov>.

Contact the FEMA Map Service Center at 1-800-368-6868 for information on available products associated with this FIS. Available products may include preliminary report letters of Map Change, a Flood Insurance Study report, and/or digital versions of this map. The FIS Map Service Center can also be reached by fax at 1-800-368-6868 or by e-mail at fis@fema.gov.

If you have questions about this map or questions concerning the National Flood Insurance Program in general, please call 1-877-FEMA-MAP (1-877-368-2627) or visit the FIS website at <http://www.flood.gov>.
