

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily denote the areas subject to flooding, particularly from local channels, creeks, or runoff etc. This information is intended for use by the community for general information and is not intended to be used for flood insurance purposes.

To obtain more detailed information in areas where Base Flood Elevations are shown, please contact the Flood Insurance Study (FIS) report for the community. The Flood Profiles and Floodway Data and/or Summary of Damaged Structures are referenced with the Flood Insurance Study (FIS) report for the community. This FIS report should be used to determine the actual depth of flood waters. Flood Insurance Study (FIS) reports are available from the Federal Emergency Management Agency (FEMA) for purchase or download.

Local Base Flood Elevations (LBEs) are the only authoritative source of LBEs. The National Flood Insurance Program (NFIP) does not use LBEs for the purpose of determining the actual depth of flood waters.
