

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify the areas subject to flooding, particularly from local drainage, or coastal on. This information is intended for use by the community for general information and is not intended to be used for any other purpose.

To obtain more detailed information in areas where **Base Flood Elevations** are shown, contact the Flood Insurance Study (FIS) report for the community. The Flood Profile and Floodway Data and/or Summary of Damaged Elevations (where relevant) in the Flood Insurance Study (FIS) report for the community. This FIS report should be used to determine the Base Flood Elevation (BFE) for a specific location. These elevations should be used in conjunction with the Flood Insurance Study (FIS) report for the community to determine the Flood Insurance Rate (FIR) for a specific location.

Coastal Base Flood Elevations shown on this map apply only to the coastal areas of the community. Coastal Base Flood Elevations (CBE) are based on the National Oceanic and Atmospheric Administration's (NOAA) National Hurricane Storm Surge Data (NHSSD). Users of this FIS report should be aware that the CBE shown on this map are based on the National Oceanic and Atmospheric Administration's (NOAA) National Hurricane Storm Surge Data (NHSSD). Elevations shown in the Summary of Damaged Elevations table should be used for construction and flood management purposes when they are higher than the elevations shown on this FIS report.

Boundaries of the **Floodways** were compiled at cross sections and interpolated between cross sections. The boundaries are based on hydrologic calculations with input from the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for the community.

Certain areas not in Special Flood Hazard Areas may be protected by flood insurance. Refer to Section 2.3 "Flood Protection Measures" of the Flood Insurance Study report for information on flood control structures for this jurisdiction.

The projection used in the preparation of this map was the Universal Transverse Mercator (UTM) projection. The datum used was the 1983 datum. Elevation in meters, reported projection of UTM zones used in the production of FISs for adjacent jurisdictions may vary in slight elevation differences in map boundaries across jurisdiction boundaries. These differences do not affect the accuracy of this FIS report.

Flood elevations on this map are referenced to the North American Vertical Datum of 1988. These flood elevations must be compared to spot elevations and ground elevations referenced to the same vertical datum. For information regarding conversion between the National Oceanic and Atmospheric Administration's (NOAA) National Hurricane Storm Surge Data (NHSSD) and the National Oceanic and Atmospheric Administration's (NOAA) National Hurricane Storm Surge Data (NHSSD) or contact the National Oceanic and Atmospheric Administration's (NOAA) National Hurricane Storm Surge Data (NHSSD) website at <http://www.ndbc.noaa.gov>.

To obtain current elevation, description, and location information for **beams** shown on this map, please contact the Information Services Branch of the National Oceanic and Atmospheric Administration at <http://www.ndbc.noaa.gov>.

Base map information shown on this map was provided by Yavapai County. This map, produced in 2005, was provided in digital format at a scale of 1:10,000.

This map, which was created and printed using digital cartographic techniques from those shown on the previous FIS for this jurisdiction. The Floodway and Floodway Data were transferred from the previous FIS report. The Flood Profile and Floodway Data tables in the Flood Insurance Study report (which contain spot elevations and other pertinent floodway data) may differ from what is shown on this map.

Geographic details shown on this map are based on the best data available at the time of publication. Because changes due to construction or development may have occurred since the map was published, map users should contact appropriate community officials to verify current corporate land locations.

Please refer to the appropriate **map keys** for an accurate map of the county showing the layout of map panels, community map regulatory addresses, and a listing of communities within National Flood Insurance Program areas for each community as well as a listing of the panels on which each community is located.

Contact the **FEMA Map Service Center** at 1-800-358-6118 for information on available products associated with this FIS. Available products may include preliminary report letters of Map Change, a Flood Insurance Study report, and digital versions of this map. The FEMA Map Service Center can also be reached by fax at 1-800-358-6118 or by e-mail at fema@fema.gov.

If you have questions about this map or questions concerning the National Flood Insurance Program in general, please call 1-877-FEMA-MAP (1-877-369-2627) or visit the FEMA website at www.fema.gov.

LEGEND

SPECIAL FLOOD HAZARD AREAS SUBJECT TO INUNDATION BY THE 1% ANNUAL CHANCE FLOOD

ZONE A
 Zone A Flood Hazard Area
 Flood depths of 1 to 3 feet (small areas of ponding); Base Flood Elevation (BFE)

ZONE AE
 Zone AE Flood Hazard Area
 Flood depths of 1 to 7 feet (small areas of ponding); Base Flood Elevation (BFE)

ZONE X
 Zone X Flood Hazard Area
 Flood depths of 1 to 7 feet (small areas of ponding); Base Flood Elevation (BFE)

ZONE D
 Zone D Flood Hazard Area
 Flood depths of 1 to 7 feet (small areas of ponding); Base Flood Elevation (BFE)

FLOODWAY AREAS IN ZONE AE
 Floodway areas in Zone AE are shown with a wavy line pattern. Floodway areas are shown with a wavy line pattern.

OTHER FLOOD AREAS

ZONE X
 Zone X Flood Hazard Area
 Flood depths of 1 to 7 feet (small areas of ponding); Base Flood Elevation (BFE)

OTHER AREAS

Zone A
 Zone A Flood Hazard Area
 Flood depths of 1 to 3 feet (small areas of ponding); Base Flood Elevation (BFE)

Zone AE
 Zone AE Flood Hazard Area
 Flood depths of 1 to 7 feet (small areas of ponding); Base Flood Elevation (BFE)

Zone X
 Zone X Flood Hazard Area
 Flood depths of 1 to 7 feet (small areas of ponding); Base Flood Elevation (BFE)

Zone D
 Zone D Flood Hazard Area
 Flood depths of 1 to 7 feet (small areas of ponding); Base Flood Elevation (BFE)
