

ELEVATION REFERENCE MARKS
REFERENCE ELEVATION MARK (FEET NGVD) DESCRIPTION OF LOCATION

RM268 3294.85 Aerial Mapping Company 1/2-inch rubber with aluminum cap flush with premark, approximately 0.2 mile south of dirt road, approximately 50 feet east-northeast from the edge of slope, approximately 1,800 feet west and 2,300 feet south of the northeast corner of Section 20, T15N, R4E.

RM273 3225.41 Aerial Mapping Company chiseled box in concrete base at southeast fence corner post, on north side of dirt road, approximately 250 feet southeast of bend in road, opposite gate post and sign. Mail Post, approximately 1,600 feet east and approximately 1,100 feet north of the southwest corner of Section 20, T15N, R4E.

LEGEND

To obtain more detailed information in areas where Base Flood Elevations (BFEs) and/or Floodway have been determined, users are encouraged to consult the Flood Profiles and Floodway Data tables contained within the Flood Insurance Study (FIS) report that accompanied this FIRM. Users should be aware the BFEs shown on this FIRM represent rounded whole-foot elevations and therefore may not exactly reflect the flood elevation data presented in the FIS. BFEs shown on this FIRM are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accurately, flood elevation data presented in the FIS should be used in conjunction with the FIRM for purposes of construction and/or floodplain management.

FIRM elevations listed on this map were obtained from data developed to establish vertical control for determination of flood elevations and floodway boundaries. Control on this map should be used only for vertical control. LRM elevations may have changed since the publication of this map. To obtain an official copy of the National Flood Insurance Geographic Survey (NGS) EIRs shown on this map, please contact the Information Services Branch of the FEMA at 207-103-2912 or visit their website at www.fema.gov. Map users should also verify the accuracy of the FEMA EIRs by comparing them with the Flood Insurance Study report for the community. Elevation shown in the Survey of Salineville (Salineville) users should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

LEGEND

SPECIAL FLOOD HAZARD AREAS INUNDATED BY 100-YEAR FLOOD

ZONE A No base flood elevations determined.

ZONE AE Base flood elevations determined.

ZONE AH Flood depths of 1 to 3 feet usually over flow on sloping terrain; average depths determined; for areas of alluvial fan flooding, velocities also determined.

ZONE AO Flood depths of 1 to 3 feet usually over flow on sloping terrain; average depths determined; for areas of alluvial fan flooding, velocities also determined.

ZONE A99 To be protected from 100-year flood by Federal flood protection system under construction; no base flood elevations determined.

ZONE V Coastal flood with velocity hazard (wave action); no base flood elevations determined.

ZONE VE Coastal flood with velocity hazard (wave action); base flood elevations determined.

FLOODWAY AREAS IN ZONE AE

OTHER FLOOD AREAS

ZONE X Areas of 500-year flood areas of 100-year flood with average depths of less than 2 feet or with damage rates less than 1 square mile; and areas protected to less than 100-year flood.

OTHER AREAS

ZONE X Areas determined to be outside 500-year floodplain.

ZONE D Areas in which flood hazards are undetermined.

UNDEVELOPED COASTAL BARRIERS

Developed 1981
Undeveloped 1991
Coastal barrier areas are normally located within or adjacent to Special Flood Hazard Areas.

NOTES

This map is for use in administering the National Flood Insurance Program; it does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size or all phenomena features outside Special Flood Hazard Areas. This community map repository should be consulted for more detailed data on BFEs, and for any information on floodway determinations, prior to use of this map for property purchase or construction purposes.

Areas of Special Flood Hazard (100-year flood) include Zones A, AE, AO, A99, AH, AO, A99, V, VE, and V1-100.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show in scale. Refer to Floodway Data Table where floodway width is shown at 100 feet.

Corporate limits shown are current as of the date of this map. The user should consult appropriate community officials to determine if corporate limits have changed subsequent to the issuance of this map.

This map may incorporate approximate boundaries of Coastal Barrier Resources System Units and/or Other Protected Areas established under the Coastal Barrier Improvement Act of 1960 (P.L. 86-383).

For community map revision history refer to countywide mappings and Section 8.0 of the Flood Insurance Study Report.

For additional map panels and base map source see separately printed Map Index.

MAP REPOSITORY

Refer to Repository Listing on Map Index.

EFFECTIVE DATE OF COUNTYWIDE FLOOD INSURANCE RATE MAP:
JUNE 6, 2001

EFFECTIVE DATE(S) OF REVISION(S) TO THIS PANEL:

Refer to the FLOOD INSURANCE RATE MAP EFFECTIVE DATE shown on this map to determine when actual rates apply to structures in zones where elevations or depths have been established.

To determine if flood insurance is available, contact an insurance agent or call the National Flood Insurance Program at (800) 485-8822.
