

REFERENCE MARK	ELEVATION (FEET NGVD)	DESCRIPTION OF LOCATION
RM97	3199.05	Aerial Mapping Company 1/2-inch rubber with aluminum cap, approximately 50 feet northeast of Middle Verde Road, approximately 100 feet northwest of dirt road, approximately 1,800 feet west and 2,200 feet north of the southeast corner of Section 2, T14N, R4E.
RM98	3164.58	5 1/2-inch rubber with aluminum cap stamped RM1228, located approximately 33 feet south of the centerline of the Verde River, approximately 79 feet from each of the northerly corners of the main bar of the Clover Leaf of the Ranch in the southeastern 1/4 of Section 3, in T14N, R4E.
RM99	3205.87	U.S. Coastal and Geodetic Survey standard dist. set, in concrete stamped X-30 1933 Elevation 3205.870, approximately 50 feet northwest of approximately north 1/4 corner, Section 9/10, T14N, R4E.
RM100	3194.73	U.S. Geological Survey cap, BM 3183 PASCT, on 3 1/2-inch iron pipe 2.19 feet above ground, approximately 800 feet southwest of Verde River along old road, approximately 500 feet north of the approximate center of Section 4, T14N, R4E.
RM101	3562.09	Aerial Mapping Company 1/2-inch rubber with aluminum cap, 27 feet above premark station is on west end of mountain with spot elevation of 3,569 feet, approximately 300 feet south and 800 feet west of the northeast corner of Section 33, T15N, R4E.
RM105	3172.23	Aerial Mapping Company chiseled box in west top of concrete bridge over irrigation ditch on south side of farm house, at east side of fork in irrigation ditch, approximately 350 feet north and approximately 2,400 feet east of the southwest corner of Section 33, T15N, R4E.
RM279	3402.36	Aerial Mapping Company 1/2-inch rubber with aluminum cap flush with premark, approximately 4,000 feet southeast of Oak Creek and Verde River intersection, approximately 45 feet south of dirt road, approximately 2,500 feet east and 650 feet south of the northwest corner Section 28, T15N, R4E.

LEGEND

To obtain more detailed information in areas where Base Flood Elevations (BFEs) or Floodways have been determined, users are encouraged to consult the Flood Profiles and Floodway Data tables contained within the Flood Insurance Study (FIS) report that encompasses the FIRM. Users should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations and therefore may not exactly reflect the flood elevation data presented in the FIS. BFEs shown on the FIRM are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

FIRM elevations based on this map were obtained and/or developed for elevation control for dissemination of flood elevations and floodplain boundaries portrayed on this map. Users should be aware that these FIRM elevations may have changed since the publication of this map. To obtain up-to-date elevation information on National Geographic Survey (NGS) data shown on this map, please contact the Information Services Branch of the NGS at (800) 713-3242 or visit their website at www.ngs.noaa.gov. Map users should seek verification of non-NGS FIRM elevation elevations when using these elevations for construction or floodplain management purposes.

Coastal FIRM shown on this map may apply only to locations of 0.5 NM or less from the FIRM. Users should be aware that coastal flood elevations are also provided in the Community of Safety Elevations table in the Flood Insurance Study report for this community. Elevations shown in the Community of Safety Elevations table should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on the FIRM.

LEGEND

SPECIAL FLOOD HAZARD AREAS INUNDATED BY 100-YEAR FLOOD

ZONE A
No base flood elevations determined.

ZONE AE
Base flood elevations determined.

ZONE AH
Flood depths of 1 to 3 feet usually area of ponds; base flood elevations determined.

ZONE AO
Flood depths of 1 to 3 feet usually sheet flow or piping; average depths determined; for areas of sheet flow flooding, depths are determined.

ZONE A99
To be protected from 100-year flood by Federal flood protection system under construction; no base flood elevations determined.

ZONE V
Coastal flood with velocity hazard; water action; no base flood elevations determined.

ZONE VE
Coastal flood with velocity hazard; water action; base flood elevations determined.

FLOODWAY AREAS IN ZONE AE

OTHER FLOOD AREAS

ZONE X
Areas of 500-year flood, areas of 500-year flood with average depths of less than 1 foot, or with depths greater than 1 foot, 1 square mile, and areas protected by levees from 100-year flood.

OTHER AREAS

ZONE X
Areas determined to be outside 500-year floodway.

ZONE D
Areas in which flood hazards are undetermined.

NOTES

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources, or small areas, or all circumstances. Features outside Special Flood Hazard Areas. This community map repository should be consulted for more detailed data on BFEs, and for any information on floodway determinations, prior to use of this map for property purchase or construction purposes.

Areas of Special Flood Hazard (100-year flood) include Zones A, AE, AO, A99, AH, AO, A99, V, VE, and VI-100.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show in scale. Refer to Floodway Data Table where floodway width is shown at 100 feet.

Corporate limits shown are current as of the date of this map. The user should consult appropriate community officials to determine if corporate limits have changed subsequent to the issuance of this map.

This map may incorporate approximate boundaries of Coastal Barrier Resources System lands and/or Coastal Barrier Resources System lands under the Coastal Barrier Improvement Act of 1980 (P.L. 96-585).

For community map revision history prior to countywide mapping, see Section 6.0 of the Flood Insurance Study Report.

For adjoining map panels and state map source see separately printed Map Index.

Refer to Repository Listing on Map Index.

EFFECTIVE DATE OF COUNTYWIDE FLOOD INSURANCE RATE MAP: JUNE 8, 2007

EFFECTIVE DATE(S) OF REVISION(S) TO THIS PANEL:

Refer to the FLOOD INSURANCE RATE MAP EFFECTIVE DATE shown on this map to determine when actual rates apply to structures in areas where elevations or depths have been established.

To determine if flood insurance is available contact an insurance agent or visit the National Flood Insurance Program at www.flood.gov.
