

- ELEVATION REFERENCE MARKS**
- | MARK | REFERENCE ELEVATION (FEET NGVD) | DESCRIPTION OF LOCATION |
|-------|---------------------------------|---|
| RM96 | 3133.46 | Aerial Mapping Company PK nail with brass washer on approximately 30 feet north of intersection of approximately 800 feet east and approximately 800 feet south of the northwest corner of Section 13, T14N, R4E. |
| RM106 | 3121.03 | Aerial Mapping Company chiselled box in north corner of concrete transformer pad, on northwest side of intersection of Horseshoe Bend Road and Brance Drive, approximately 2,400 feet east and approximately 2,700 feet south of the northwest corner of Section 13, T14N, R4E. |
| RM107 | 3128.31 | Aerial Mapping Company 1/2-inch rebar with aluminum cap stamped RM 117, AMC 15-7146, located on the centerline of Verde River Drive and the edge projected of Ash Lane, flush with the pavement, approximately 1,200 feet west and approximately 50 feet north of the northeast corner of Section 14, T14N, R4E. |
| RM108 | 3515.65 | From the Yavapai County complex west of Cherry Creek Road, go west 0.9 mile to the west side of Cherry Creek on the highway to Cotton Wood. Station is located 1,500 feet south of the highway on the ridge to the west of Cherry Creek, approximately 1/4 mile northwest of the southwest corner of Section 9, Station is on aluminum cap on a 1/2-inch rebar. |
| RM114 | 3108.63 | Aerial Mapping Company PK nail with brass washer on centerline of paved road, opposite power pole marked P5 105291, approximately 1,500 feet south and approximately 2,400 feet west of approximate northeast corner of Section 24, T14N, R4E. |
| RM117 | 3117.33 | Arizona Department of Transportation aluminum cap stamped 1978 2117.34, in the top of the concrete wall at the north end of the southbound lane of the Interstate 17 (State Route 19) bridge, approximately 1,300 feet north and approximately 2,700 feet west of the southwest corner of Section 24, T14N, R4E. |
| RM123 | 3112.73 | From the intersection of North Drive and Highway 260 (Cotton Wood Highway), go east on North Road to Park Lane, south on Park Lane to Park Verde Road, then east to Wood's Ditch. Station is a cotton picker spindle. |

LEGEND

To obtain more detailed information in areas where Base Flood Elevation (BFE) or floodway have been determined, users are encouraged to consult the Flood Profiles and Floodway Data tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations and therefore may not exactly reflect the flood elevation data presented in the FIS BFEs shown on the FIRM are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation data presented in the FIS should be used in conjunction with the FIRM for purposes of construction and/or floodplain management purposes.

FIRM elevations listed on this map were obtained and/or developed to establish vertical control for determination of flood elevations and floodplain boundaries portrayed on this map. Users should be aware that these FIRM elevations may have changed since the publication of this map. To obtain up-to-date elevation information on National Geodetic Survey (NGS) benchmarks shown on this map, please contact the National Geodetic Survey at 1901 755-2542 or use their website: www.ngs.noaa.gov. Users should also consult the National FIRM Improvement Schedule, which lists the dates for construction of floodplain management purposes.

Current BFEs shown on this map may apply only to the date of the FIS. Users of the FIRM should be aware that coastal flood elevations are also provided in the Summary of Hydrologic Data table in the Flood Insurance Study report for the community. Elevations shown in the Summary of Hydrologic Data table should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

LEGEND

SPECIAL FLOOD HAZARD AREAS INUNDATED BY 100-YEAR FLOOD

- ZONE A** No base flood elevations determined.
- ZONE AE** Base flood elevations determined.
- ZONE AH** Flood depths of 1 to 3 feet usually short flow on existing floodway; average depths determined; the area of inundation boundaries determined.
- ZONE AO** Flood depths of 1 to 3 feet usually short flow on existing floodway; average depths determined; the area of inundation boundaries determined.
- ZONE A99** To be protected from 999-year flood by Federal flood protection systems under construction; no base flood elevations determined.
- ZONE V** Coastal flood with velocity-based wave action; no base flood elevations determined.
- ZONE VE** Coastal flood with velocity-based wave action; base flood elevations determined.

FLOODWAY AREAS IN ZONE AE

OTHER FLOOD AREAS

- ZONE X** Areas of 500-year flood areas of 900-year flood with average depths of less than 1 foot or with damage areas less than 1 square mile and were protected by levees from 900-year flood.

OTHER AREAS

- ZONE X** Areas determined to be outside 500-year floodway.
- ZONE D** Areas in which flood hazards are undetermined.

UNDEVELOPED COASTAL BARRIERS

- Identified 1993
- Identified 1994
- Other: Protected State

Coastal barrier areas are normally located within or adjacent to Special Flood Hazard Areas.

BOUNDARIES

- Floodway Boundary
- Floodway Boundary
- Zone D Boundary
- Boundary Dividing Special Flood Hazard Zones, and Boundary Dividing Areas of Different Coastal Base Flood Elevations Within Special Flood Hazard Zones
- Base Flood Elevation Line, Elevation in Feet. See Map notes for Elevation Datum.
- Coast Section Line
- Base Flood Elevation in Feet Where Uniform Width Zone. See Map Index for Elevation Datum.
- Elevation Reference Mark
- River Mile
- Horizontal Coordinates Based on North American Datum of 1983 (NAD 83) Projection.

NOTES

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from flood damage caused by wind action or from seismic, volcanic, or other causes. Special Flood Hazard Areas. The community map repository should be consulted for more detailed data on BFEs, and for any information on floodway delineations, prior to use of this map for property purchase or construction purposes.

Areas of Special Flood Hazard (100-year flood) include Zones A, AE, AH, AO, A99, V, VE, and X.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show to scale. Refer to Floodway Data Tables where floodway width is shown at 100 feet.

Corporate limits shown are current as of the date of this map. The user should contact appropriate community officials to determine if corporate limits have changed subsequent to the issuance of this map.

This map may incorporate approximate boundaries of Coastal Barrier Resource System Units and/or Otherwise Protected Areas established under the Coastal Barrier Improvement Act of 1982 (P.L. 97-353).

For community map revision history prior to nationwide mapping, see Section 6.2 of the Flood Insurance Study Report.

For editing map panels and base map source are separately printed. Map index.

MAP REPOSITORY

Refer to Repository Listing on Map Index

EFFECTIVE DATE OF COUNTRYWIDE FLOOD INSURANCE RATE MAP:

JUNE 6, 2001

EFFECTIVE DATE(S) OF REVISION(S) TO THIS PANEL:

Refer to the FLOOD INSURANCE RATE MAP EFFECTIVE DATE shown on this map to determine when actual rates apply to structures in zones where elevations or depths have been established.

To determine if flood insurance is available, contact an insurance agent or call the National Flood Insurance Program at 800-638-6622.
