

ELEVATION REFERENCE MARKS
REFERENCE ELEVATION MARK (FEET MSL) DESCRIPTION OF LOCATION
RM125 3162.07 From the intersection of the south access road to Camp Verde and Bellison Road, go south to the north side of Copper Canyon Wash in Section 11, T13N, R4E. Station is located 1,000 feet west of Split Mine Road and north 200 feet from Copper Canyon Wash. It is 114.75 feet south of the dirt road along the north bank of Copper Canyon Wash. Station is on aluminum cap on a 1/2-inch rebar.

LEGEND

To obtain more detailed information in areas where Base Flood Elevation (BFE) and/or floodways have been determined, users are encouraged to consult the Flood Profiles and Floodway Data Tables contained within the Flood Insurance Study (FIS) report that accompanies this FIRM. Users should be aware that BFEs shown on this FIRM represent rounded whole-foot elevations and therefore may not exactly reflect the flood elevation data presented in the FIS. BFEs shown on the FIRM are rounded to the nearest foot; therefore, for purposes only and should not be used as the sole source of flood elevation information. And, any flood elevation data presented in the FIS should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

FIRM elevations listed on this map were obtained and/or developed to establish vertical control for determination of flood elevations and floodway boundaries portrayed on the map. Users should be aware that these FIRM elevations may have changed since the publication of this map. To obtain the latest elevation information on flood profiles, Survey (NSR) FIRM, shown on this map, please contact the Information Services Branch at the NSR at (202) 755-2242 or visit their website at www.floodmaps.gov. Map users should seek verification of non-FIRM elevation information shown using these elevations for construction and/or floodplain management purposes.

Coastal BFEs shown on this map only apply only to the extent of the FIRM. Users of this FIRM should be aware that coastal flood elevations are not provided in the Summary of Station Elevations table in the Flood Insurance Study report for this community. Therefore, shown in the Summary of Station Elevations table should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on the FIRM.

NOTE: MAP AREA SHOWN ON THIS PANEL IS LOCATED WITHIN TOWNSHIP 13 NORTH, RANGE 4 EAST AND TOWNSHIP 14 NORTH, RANGE 4 EAST.

LEGEND

SPECIAL FLOOD HAZARD AREAS INUNDATED BY 100-YEAR FLOOD

ZONE A No base flood elevations determined.

ZONE AE Base flood elevations determined.

ZONE AH Flood depths of 1 to 3 feet usually areas of ponding; base flood elevations determined.

ZONE AO Flood depths of 1 to 3 feet usually, short flow on sloping terrain; average depths determined for areas of shallow flooding; velocities also determined.

ZONE A99 To be protected from 100-year flood by Federal flood protection system under construction; no base flood elevations determined.

ZONE V Coastal flood with velocity hazard; wave action; no base flood elevations determined.

ZONE VE Coastal flood with velocity hazard; wave action; base flood elevations determined.

FLOODWAY AREAS IN ZONE AE

OTHER FLOOD AREAS

ZONE X Areas of 100-year flood areas of 100-year flood with average depths of less than 1 foot or with drainage areas less than 1 square mile, and areas protected by levees from 100-year flood.

OTHER AREAS

ZONE X Areas determined to be outside 100-year floodplain.

ZONE D Areas in which flood hazards are undetermined.

UNDEVELOPED COASTAL BARRIERS

Undeveloped 1985 Undeveloped 1990 Undeveloped 2000
Coastal barrier areas are normally located within or adjacent to Special Flood Hazard Areas.

River Mile
Floodway Coordinates Based on North American Datum of 1927 (NAD 27) Projection.

NOTES

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size or of ephemeral features outside Special Flood Hazard Areas. The community map repository should be consulted for more detailed data on BFEs, and for any information on floodway delineations, prior to use of this map for property purchase or construction purposes.

Areas of Special Flood Hazard 100-year flood, include Zones A, AE, AO, A99, AH, AO, A99, V, VE and VI-V30.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show to scale. Refer to Floodway Data Table where floodway width is shown at 1/20 inch.

Corporate limits shown are current as of the date of this map. The user should contact appropriate community officials to determine if corporate limits have changed subsequent to the issuance of this map.

This map may incorporate appropriate boundaries of Coastal Barrier Resources System Units and/or Otherwise Protected Areas established under the Coastal Barrier Improvement Act of 1982 (P.L. 97-348).

For community map revision history prior to countywide mapping, see Section E.2 of the Flood Insurance Study Report.

For additional map panels and base map, users see separately printed Map Index.

MAP REPOSITORY
Refer to Repository Listing on Map Index.

EFFECTIVE DATE OF COUNTRYWIDE FLOOD INSURANCE RATE MAP:
JUNE 6, 2001

EFFECTIVE DATE(S) OF REVISION(S) TO THIS PANEL:

Refer to the FLOOD INSURANCE RATE MAP EFFECTIVE DATE shown on this map to determine when structural alterations to structures in areas where alterations or damage have been established. To determine if flood insurance is available, contact an insurance agent or visit the National Flood Insurance Program at 800-538-6623.
