Subject: Yavapai Reports
Attachments: Yavapai Reports.zip

Hi Mark,

I have attached a ZIP file containing the following:

LiDAR: A .JPG file of the LiDAR vendor's layout as well as the final LiDAR report

Photogrammetry: We were required to print out the Photogrammetric Aerotriangulation report (which was hundreds of pages), so I have attached the text files for you. There is also an Excel file which was a reference for Charlie Cave. We delivered one set of bound 9"x9" contact prints, so the Excel file is the reference of which image in is which book.

Survey Control: I have attached a text file of the ground control coordinates that were set by RST Land Surveying as well as an Excel file showing the blind panels set by Jody Stone, RLS.

I believe that RST prepared a separate survey report as they also set monuments for Charlie and submitted them to the NGS. I do not seem to have a copy of that, so if you need it, you may have to go through Charlie.

Let me know what additional information you will need.

Thanks!

>Kurt
